Good dental health is essential to overall health.

Dental coverage from Wellmark Blue Cross and Blue Shield is a cost-effective and convenient way to maintain a healthy smile. Dental coverage offers you the same dependable quality and service you’ve come to trust in our health products.

WHAT’S COVERED

Our dental plans are designed to keep your teeth healthy through preventive dental care. That’s why things like check-ups, cleanings and routine (diagnostic and preventive) services are there for you at little or no cost, depending on your specific plan. In addition to basic dental benefits, your plan could include other specialty products and services, such as orthodontics, oral surgery or endodontics.¹

LOCAL AND NATIONAL DENTAL NETWORKS

When you’re in the local service area, which includes the entire state of Iowa and bordering contiguous counties, make sure to visit a preferred provider who participates in the Iowa dental network to receive services at the lowest cost. Our network is one of the largest dental networks in the area and the second largest in the nation, ensuring you can see savings in nearly any area in the state.

If you reside or travel outside the Iowa network service area, you can visit a dentist who is a participating provider in the national network. The national network includes more than 82,000 unique dentists. Just show your dental ID card to the participating dentist.

Optional coverage you need

Our dental plans provide optional coverage for diagnostic and preventive care, restorative care, and other specialty services. You may add dental coverage during your group's enrollment period.

Covered dental services

Please refer to your group dental plan for specific coverage and benefit information, including cost-share arrangements and exclusions.
